Please note: These will be duplicate live sessions. The same information will be presented in both Webinars. Please only register for one session. We also strongly encourage you to gather your colleagues and view the Webinar together in a conference room. This will allow you to discuss how you will use this information to move forward right after the session concludes.

The Home Health Quality Improvement (HHQI) National Campaign is reigniting its efforts to help you improve quality with new evidence-based educational tools, individualized data reports and a variety of networking opportunities for home health and cross-setting providers. It all starts on September 18 with a free Welcome Webinar detailing campaign enhancements and featuring authentic accounts of how home health providers have applied HHQI resources to make an impact on their patients.

If you share our vision of improved quality, then this is the event for you. And as with all that HHQI offers, it's absolutely free. If you are unavailable to attend one of the sessions on September 18, then you can view an archive of the Webinar shortly after it concludes at www.homehealthquality.org.

Please gather your colleagues, reserve a conference room, and register to attend the 2012 HHQI National Campaign Welcome Webinar using one of the links above. It's your next step to move forward with improving home health quality.
