

Missouri Alliance for Home Care presents...

Person Centered Planning

Featuring: Gina Hilton, CEP, RN, BSN, WCC, CLNC

DATE RECORDED: August 27, 2013

This is a pre-recorded educational program.

Do you want to have the highest reimbursement levels in your home care organization? Do you desire to have the best outcomes possible and score high above your competitors and become a leader of home care in your community?

Person Centered Planning is the new focus of Medicare. In order to obtain the best outcomes for all clients and keep them in their home settings the longest, we need to rethink the way we treat each person. Person Centered Planning provides you with a variety of tools used to find out the characteristics, basic needs and desires of each individual you provide service for and help you focus outcomes on those things. In doing so, you (the provider) have the best treatment path and therefore your outcomes will be higher, your retention rates will increase and your clients will remain in their home settings as long as possible.

Presenter: Gina Hilton worked most of her clinical career in critical care & started her own home care company, FirstCall HomeCare in 2001. They serve a wide variety of clients from developmentally disabled young children on ventilators to the elderly all in the comfort of their own homes. Gina became certified in person centered planning in 2005, and has been using its components successfully with her clients and staff ever since.
