

OASIS-C2 Wound Assessment and Documentation

Webinar & Audio Recording-Wednesday, June 20, 2018 • 1:00—2:00 pm CST

Clinicians frequently identify the integumentary portion of the OASIS-C2 assessment to be the most challenging component. Join OASIS expert Anita Werner from Fazzi Associates, Inc. as she helps to simplify assessment of wounds and responding to these difficult M-items. Learn key concepts including identification of wound etiology, staging of pressure ulcers, determining the healing status of wounds, and interpretation of OASIS-C2 Guidance Manual and Q&A instructions. Accurate integumentary responses on the OASIS-C2 lead to improved wound healing outcomes, accurate episodic reimbursement, and appropriate non-routine supply payments. Don't miss this opportunity to ensure your documentation supports the great care you provide!

Objectives—At the completion of this webinar, participants will be able to:

- Categorize and capture wounds accurately on the OASIS-C2 assessment following CMS guidance.
- Evaluate healing status and/or staging of wounds accurately on the OASIS-C2 assessment.

About our Speaker:

Anita Werner, RN, BCHH-C, COS-C, Senior Compliance Consultant at Fazzi Associates, As Senior Compliance Consultant, Anita Werner is widely known as an OASIS expert, instructor, enthusiast, devotee, coach and mentor. She has over 30 years of nursing experience and over 20 in home care. Prior to joining Fazzi, she ran a successful consulting practice providing agencies with advisory services, education, clinical direction, audits and reviews in several critical areas. In addition to OASIS, she is also a recognized expert in coding, quality and compliance. A frequent presenter at state and national conferences, she is appreciated far and wide for her ability to make complex concepts and regulations real and understandable.
