

The Aide's Role in Caring for Older Adults In Home Care

A Webinar • Thursday, August 9, 2018 • 2:00—3:00 p.m. CST

Presented by **Kathie Smith, RN, BSN**

According to Healthy People 2020 from the Office of Disease Prevention and Health Promotion, as Americans live longer, growth in the number of older adults is unprecedented. In 2014, 14.5% (46.3 million) of the US population was aged 65 or older and is projected to reach 23.5% (98 million) by 2060. Aging adults experience higher risk of chronic disease. In 2012, 60% of older adults managed 2 or more chronic conditions. Many of the clients you provide care for in the home will be older adults with chronic conditions such as heart, lung, kidney disease, diabetes, cancer or other conditions. This presentation will focus on providing care for the older population.

Use this session to meet your training requirements. All in-services emphasize the role of home care aides in observation and reporting. It is the responsibility of the home care company to determine if this workshop meets the specific requirements of its aides. The Missouri Department of Health & Senior Services affirms that this session meets the requirements found at 484.36[b] of the Medicare Conditions of Participation and for in-home service companies, this session meets the required standard for on-going training of aides.
