

# The Aide's Role in Caring for Non-Surgical Orthopedic Patients

A Webinar • Thursday, February 14, 2019 • 2:00—3:00 p.m. CST

Presented by **John Conrad and Libby Hart, RN**

Home Health and Hospice aides deliver what many patients, and their families, consider the most essential treatment in this phase of their life. These compassionate aides assist with bed positioning, sit-to-stand transfers, and falls prevention when walking with the patient. Orthopedic issues, including joint pain, limitations in the range of motion, arthritis, tendonitis, spinal stenosis, fractures, and osteoporosis, can create a variety of challenging situations that require advanced knowledge for optimal patient care. This webinar will address some common strategies for patient movement while protecting our aides from injury.

Use this session to meet your training requirements. All in-services emphasize the role of home care aides in observation and reporting. It is the responsibility of the home care company to determine if this workshop meets the specific requirements of its aides. The Missouri Department of Health & Senior Services affirms that this session meets the requirements found at 484.36[b] of the Medicare Conditions of Participation and for in-home service companies, this session meets the required standard for on-going training of aides.
