

The Missouri Alliance for Home Care presents...

OASIS-D, TEAM COORDINATION & INCREASED OUTCOMES

Webinar & Audio Recording for Clinical Managers, QAPI Coordinator & All OASIS Clinicians
Wednesday, May 1 & 8, 2019 • 9:00—11:00 am CST

Presented by: Sharon Litwin, RN, BSHS, MHC, HCS-D, 5 Star Consultants

May 1, 2019

This session will carefully review the OASIS D data set, focusing on the new items. Due to the IMPACT act—standardizing data for all post-acute care providers is very detailed, long and specific, particularly the difficult GG functional ability and goals. Utilizing CMS training and the Medicare OASIS manual, Sharon will clarify and explain the OASIS D data set.

May 8, 2019

Effective case management is dependent upon the interdisciplinary team working together towards collaborative goals and coordinating the patient care in a pro-active manner. Effective case management can enhance patient outcomes by planning a course of interventions and developing a plan to achieve the goal. This session will identify and define a case management system that will meet individual patient needs and increase patient outcomes. The session will also show how to complete an accurate comprehensive patient assessment in a standardized manner throughout the entire interdisciplinary team.

Registration Form
