

Pharmacology Refresher for Home Health Therapists & Nurses

4-Part Webinar Series & Recordings

Wednesday's, September 30, October 28, November 18 & December 16, 2020

2:00—3:00 pm, CST

Home health clinicians encounter all types of medications in their patients' medicine cabinets and it is important that they are well-grounded in pharmacology. This webinar series will cover the key principles of pharmacology and review medications used to treat common diseases and conditions.

Series participants will learn concepts important to the use of medications in patients including common terminology, the effect of comorbid disease or concomitant medications on therapeutic and toxic effects, and special considerations based on a patient's age and comorbidities. To introduce pharmacy practice, the session will discuss routes of drug administration and general time to onset of effect, advantages, and disadvantages of various drug information sources, and will provide recommendations on medication history taking and medication reconciliation in the patient's home.

Part 1-Principles of Pharmacology and Pharmacy Practice

Part 2-Medications Used in the Treatment of Cardiovascular and Respiratory Conditions

Part 3- Medications Used in the Treatment of Diabetes

Part 4-Medications Used in the Treatment of Pain and Inflammation

Presenter: **Tayla Rose, PharmD, MEd, RPh, BCACP, CDE**, serves as an Assistant Clinical Professor in the Bouvé College of Health Sciences School of Pharmacy at Northeastern University in Boston, MA. She also practices as an ambulatory care clinical pharmacist and completed a Post-Graduate Year 1 (PGY1) Pharmacy Residency with a focus in Ambulatory Care at Northeastern University and Federally Qualified Health Centers (FQHCs) Program of All-Inclusive Care for the Elderly (PACE). Tayla received her B.S. in Pharmacy Studies and Doctor of Pharmacy (PharmD) from the University of Connecticut in 2011 and 2013, respectively.
